

Environmental Policy

McCosker Contracting PTY LTD undertakes a range of civil construction contracts, the locations of which are sometimes in sensitive environments. The nature of the Company's activities, leads to the disturbance of both the human and physical environment, within and outside the project site.

It is the policy of the Company to control these effects, and to ensure that the requirements of the project specification and applicable legislation, regulations and other policy requirements are met as a minimum, through the implementation of an Environmental Management System.

Notwithstanding that the requirements of legislation, regulations and other policy requirements shall be met, the Company has accepted the challenge, and is committed to continually improving the way in which it conducts it's activities and the outcomes of these activities, including the environment. We are committed to sustainability through efficient use of resources, prevention of pollution, procurement and waste minimization.

It is a requirement of the Company that environment objectives and targets shall be set for all projects and plant workshops. These objectives shall be reviewed regularly to address environmental requirements and concerns of Clients and the Community, and as improved levels of performance are achieved, goals are set for further improvement.

This policy statement is to be displayed in prominent locations in the Head and Project offices.

These displays and publications serve to demonstrate to our Clients, Colleagues and the Public our commitment to achieving our objective and to remind ourselves of our responsibilities to the environment.

A handwritten signature in black ink, appearing to read "Bob McCosker".
